All losses were reported the cause of lightening stroked

Overall the loses of human are in majority, as per sharing of social media and old age people no any person in history seen these type of loses by the lightening stroked, excluding this, community from Tharparkar lost their crops, because they have collected the crops and stored at one place, while that were not fully protected from rains, because of current season is not expected rainy season and community fully lost their crops yield. After this rain spell the grasses available in rangeland / pasture land will be fully destroyed, and people will again face difficulties the fodder shortage in peak dry seasons.

Precautionary measures:

The following precautionary measures are suggested to community for their safety purpose;

- Keep livestock in houses
- Cover vulnerable houses by any plastic or other safe material
- More Care for persons with different abilities and elders
- Close coordination with line departments and Civil Society organization
- Take regular update from social media or other resources (Radio etc)
- Coordinate with nearby communities in case of any emergency situation
- Keep important contact numbers written on a paper, with themselves
- Use local / technical methods to prevent from lightening strokes
- Cover the stored crops with local methods / Tree's raw material for protecting from rain water
- Stop collecting the crops which is still as it in agricultural field till stop the series of rain spells, because collected and stored crops / raw material will fully destroy by raining, the color of produced crops will be converted into back color and not will be useful
